IT Solutions & Training

OUR PROFILE

I-Net infotech is an IT Services Company that cost effectively provides cutting edge information technology services to a global clientele spread across the globe. I-Net infotech focuses on software development, network solutions and IT training. I-Net infotech helps companies align Information Technology with their organizational goals and business objectives, while ensuring enhanced operational efficiency, greater flexibility and substantial cost savings. Our goal is to maintain and grow a culture of IT engineering and customer service excellence through a continuous process improvement program.

I-Net provides a cutting edge through modern technologies and qualified professionals. We are delivering high end technical solutions which meet customer requirements in richly acceptable manner. We are registered partners of CISCO and Microsoft. We are following a professional and strategic approach to deliver technology driven solutions to our customers every time. In the area of network solutions, I-Net became a remarkable strength so far with our hard work and dedication. Our Mission is to enhance business effectiveness by providing cost-effective, innovative and quality Information Technology solutions and services. We consider clients are our biggest asset and strength. We aim at Total Customer Satisfaction. We focus on the requirements and expectations of our customers and strive to exceed them so as to provide world-class products and services through continuous innovations and improvement of our services. We acquired a good circle of satisfied and perpetually growing clientele through our authentic approaches. Our mission is to meet all commitments to customers on time & in affordable budget by continuously monitoring, improving and benchmarking the products, services, organization and employees potential with empowered employees and management.

TRAINING OVERVIEW

IT is an empowering technology when rightly employed leads to productivity and prosperity at individual and organizational level. I-Net furnishes best training in IT through updated programs and technologies. Practical oriented programs lead to get in touch with real time scenario. I-Net provides students with hands-on training and relevant courses to stay abreast requirements of the I.T. world. I-net offers internationally certified courses in the area of software and networking. Training is led by a team of professionally qualified and experienced hands. Training is fully practical oriented so that trainees will have hands on experience with the technology. I-Net conceives identity and credibility of human brains and helps to obtain an opening to the career.

MCITP

The Microsoft Certified IT Professional (MCITP) credential is the leading certification for Windows Server 2008, providing widely recognized, objective validation of your ability to perform critical current IT job roles by using Microsoft technologies to their best advantage. Now you can distinguish yourself as an IT professional with the current skills and proven job-role capabilities to work effectively in a Microsoft network

environment. I NET provides certifications training for the MCITP: Server Administrator, and the MCITP: Enterprise Administrator.

MCITP: Server Administrator

The Microsoft Certified IT Professional (MCITP) credential is the leading certification for Windows Server 2008, providing widely recognized, objective validation of your ability to perform critical, current IT job roles by using Microsoft technologies to their best advantage.

Configuring Windows Server 2008 Active Directory 70-640 Certification

Configuring Windows Server 2008 Network Infrastructure 70-642 Certification

Windows Server 2008 Server Administrator 70-646 Certification

MCITP: Enterprise Administrator

The Enterprise Administrator certification will help you develop and validate your skills in your current position or advance you towards a future job role, such as: Enterprise Systems Administrator; IT Systems Manager; Enterprise Security Administrator; Systems Architect; or Network Administrator. Candidates for these certifications are IT professionals who seek a leadership role in Windows infrastructure design in a current or future job role, in which they work with Windows Server 2008.

- Configuring Windows Vista (70-620)
- Configuring Windows Server 2008 Active Directory (70-640)
- Configuring Windows Server 2008 Network Infrastructure (70-642)
- Configuring Windows Server 2008 Applications Infrastructure (70-643)
- Windows Server 2008 Enterprise Administrator (70-647)

MCITP Database Administrator 2008

Microsoft SQL Server 2008 is a complete set of enterprise-ready technologies and tools that help people derive the most value from information at the lowest total-cost-of-ownership. As a database administrator, your specialized training in database maintenance & optimization puts you in charge of an organization's important data solutions. You ensure that database security, availability, and performance satisfy business requirements.

Exam 70-432:
TS: Microsoft SQL Server 2008, Implementation and Maintenance

Exam 70-450:
PRO: Designing, Optimizing and Maintaining a Database Administrative Solution Using Microsoft SQL Server 2008

Microsoft Internet Security and Acceleration Server 2006

Microsoft Internet Security and Acceleration Server (ISA Server), is a network security and protection solution for Microsoft Windows, described by Microsoft as "enables businesses by allowing employees to safely & productively use the Internet for business without worrying about malware and other threats"

Exam 70-351:
TS: Microsoft Internet Security and Acceleration Server 2006, Configuring

MCITP: Enterprise Messaging Administrator

Professionals with Microsoft Certification will get a definite chance of challenges of the IT field and take the initiative to develop and hone their skills that so they can stay always ahead of others. When you become Microsoft certified, you will:

The Microsoft Certified IT Professional: Enterprise Messaging Administrator (MCITP: Enterprise Messaging Administrator) is the premier certification to highlight a professional's area of expertise. This certification validates the knowledge and skills associated with performing as the lead engineer for messaging solutions within an enterprise organization, as well as the ability to design and deploy messaging solutions with Microsoft Exchange Server 2010.

Prerequisite MCTS certification
Exam 70-662:
TS: Microsoft Exchange Server 2010, Configuring
Exam 70-663:
Pro: Designing and Deploying Messaging Solutions with Microsoft Exchange Server 2010

Red Hat Certified Engineer (RHCE)

Red Hat Certified Engineer (RHCE) is a performance-based test that measures actual competency on live systems. Called the "crown jewel of Linux certifications," RHCE proves an individual's ability to configure networking services and security on servers running a Red Hat OS. RHCE was recently named the hottest certification in all of IT by CertCities.com.

The RHCE Exam

Red Hat Certified Engineer (RHCE) is earned by a Red Hat Certified System Administrator (RHCSA) who has demon-

strated the knowledge, skill and ability required of senior system administrators for Red Hat Enterprise Linux systems. The RHCE Exam (EX300) is a hands-on, performance-based, two-hour exam. Red Hat recommends that participants augment their skills and build on their expertise by reading the RHCE exam objectives guide. In addition, Red Hat offers clear training paths for candidates to learn the required skills.

Certified Wireless Network Associate (CWNA)

The CWNA (Certified Wireless Network Administrator) certification is a foundation level wireless LAN certification for the CWNP Program. Your CWNA certification will get you started in your wireless career by ensuring you have the skills to successfully administer enterprise-class wireless LANs.

Diploma Courses

LAPTOP Engineering

- Introduction & History of Laptops
- Difference between Laptop, Notebook and Netbooks
- Different types of laptop repairing tools
- Difference between Laptop & Desktop hardware components
- Different types of laptop hardware components
- Installing & upgrading hard disk drives & memory modules
- Assembling of different types and models of Laptops
- Wireless devices of laptops and its IEEE standards
- PCMCIA Configuration

- Portable Hard Drives and Bluetooth devices
 - Hard Disk Servicing
 - Keyboard and Touchpad Servicing
 - IDE and Mini IDE Servicing
 - Laptop Display Servicing
 - Laptop Power Supply Servicing
 - Laptop Chip-Level Servicing
 - Download Links of laptop Drivers
- More details: www.laptopengineering.com

Master of LAPTOP Engineering with wireless Networking (MLE)

It was in 90's when the laptop revolution is started. Silently it's grown up and Laptop Service Industry is now One of the fastest Growing Industry in the world. Inet's Master of Laptop Service Engineering With Wireless networking Course will help you to have to achieve the speed that you will need to lead the laptop service Industry .

Syllabus

A+, N+, Laptop Engineering, Laptop Servicing, Chip Level Servicing, MCITP, CCNA, Wireless Networking, Security Plus.

Our Area of Expertise

- 2003 Server
- 2008 Server
- ISA 2006
- MySQL
